

# Lunar landing, cat game!

I created a lunar landing game but with a cat and his parachute.

There is four different states of the game.

1. Start screen, if you press start you'll start playing the game.
2. You win! If you managed to win the game (get the cat to safely land on the grass)
3. You lose! If the cat lands on the ground with too much speed.
4. Restart game! You'll get the chance to play again.
